

11 July 2011

To Whom It May Concern,

I have known Mr. Michael Hill of Neumode Design and Construction Pty Ltd for a period of approximately ten years. In that time, his company has been the builder on a number of projects design, documented and supervised by Clive Steele Partners.

Michael has an excellent ability to read construction drawings and I have always found him to be very organized and meticulous in his approach to managing sometimes difficult construction programmes. He is always prepared to seek further instructions, if something is unclear or on-site conditions differ from those documented. He also offers valuable input and suggestions on best construction methods.

Our involvement with Michael has included large residential projects with some involving complicated site retention systems.

I am also aware of Neumodes three MBAV construction awards in the past 5 years, one of which was for a project designed by this office.

I would have no hesitation in recommending Michael for the construction and management of all types of building works.

Yours faithfully,
CLIVE STEELE PARTNERS PTY. LTD.

I K FLANDERS, M.I.E.Aust.
